

SALES

We believe that there is more than just making a sale. Profile Food Ingredients is about the relationship and developing partnerships. We know it is important to understand your customer's needs. If we cannot provide you with your needs, we will connect you with a contact who can.

CUSTOMER SERVICE

Customer Service is a key ingredient to our business. When you call PFI during normal business hours you will always speak to a live person.

Our group believes in professionalism, dedication and creativity when it comes to providing you service.

TECHNICAL SERVICE

PFI has over 15 years experience in the food industry. We are well versed in equipment, processing, formulating and sanitation. Although ingredients and service play a small part in volume, they are the most critical to a manufacturer. Our team will stay in your plant until you are satisfied with the end results. Our pilot plant contains all the necessary equipment for us to simulate the manufacture of your finished products so that we can make the best recommendations for the proper stabilization and finished formulations.

Our applications group will work with you side by side to find the solution that fits your needs. Whether it is a finished product, one ingredient, nutritional information or ingredient statements we can help.

MANUFACTURING

Our experience in manufacturing is second to none. This results in efficiency and improved quality making it possible for our customers to stay competitive in their market.

We follow stringent policies and procedures to ensure the product is consistent and safe at all times. Our allergen room allows us to manufacture all products in a safe environment eliminating cross contamination of the allergenic and non-allergenic products.

Combined with our Quality Assurance group we strive to meet high level standards. Quality begins but never ends with products and services from Profile Food Ingredients.

CUSTOM BLENDED FUNCTIONAL FOOD SYSTEMS

Profile Food Ingredients has a complete line of stabilizer/emulsifier systems to meet every need for the dairy, bakery and beverage processor. We have experience in developing, formulating and supporting customers in all phases of stabilization for their products. All of our systems are tested from raw material to finish application by our technical group.

Our systems can meet Kosher, all natural, nutritional and even organic claims as well as EU standards.

In addition to our existing line of products, PFI can custom blend a system specific to your needs.
